

South London  
Cardiac and Stroke Network

10<sup>th</sup> May 2011

Welcome to today's event, *Implementing the Department of Health's (DH) Cardiac Rehab Commissioning Pack: What it means to you*. We hope you will find today's session interesting and informative. We've created today's agenda to provide you with a full understanding of what is included in the pack plus practical tips that you can use in your site to improve your practice.

The commissioning pack provides the tools needed to help commissioners and providers improve the quality of services for patients through clearly defined outcomes that help drive efficiency by reducing unwarranted variation in services.

The South London Cardiac and Stroke Network have been involved in the development of the DH cardiac rehab commissioning pack since 2008. We have provided data and input, both clinical and financial, to develop this valuable resource.

Since the pack was published last October, two pilot sites in Wandsworth and Kingston have been set up. Lessons learned from these two sites will help the Network both support you and facilitate implementation across the whole of South London.

If you would like any further information following today's event, please don't hesitate to contact us on (020) 8812 5950 or via email at [info@slcsn.nhs.uk](mailto:info@slcsn.nhs.uk).

I hope you enjoy the day and I look forward to meeting as many of you as possible in the near future to discuss how the Network can support you in your cardiac rehabilitation services.

Best wishes,

Lucy Grothier  
Director  
South London Cardiac and Stroke Network
