Dear Colleague,

We are holding a study day on Inherited Cardiac Conditions (ICC) to which you are cordially invited.

The event will be of interest to those who work in genetics, cardiology, paediatric cardiology and general medicine

It will provide an overview of common inherited cardiac conditions, including:

- Clinical aspects of inherited cardiomyopathies and arrhythmias
- Management considerations in both the paediatric and adult settings
- Strategy for molecular investigations
- Research developments

A group of speakers all of whom are part of the ICC team at King's Health Partners will be speaking to highlight the organisational expertise in this area, referral pathways and management guidelines in this group of disorders.

We hope you will be able to join us for this study day that is sponsored by Shire Human Genetic Therapies and will be **free of charge** for delegates. Please let us know if you can by completing the attached registration form and returning it to us by **Tuesday 18th January, 2011**.

If you have any questions please contact Dr Leema Robert (leema.robert@gstt.nhs.uk) or Sharon Anderson (sharon.anderson@gstt.nhs.uk), telephone 020 7188 1364.

We look forward to seeing you.

Best wishes,

Dr Leema Robert
Consultant in Clinical Genetics
Guy's Hospital, London
